SUMMARY

Interaction Designer with a product design background creating consumer-facing experiences across mobile and web. Redesigned a subscription onboarding flow that reduced sign-up steps by 38%, and prototyped an AI-powered food search experience designed to reduce decision time and improve confidence. Skilled in user flows, visual systems, data-informed iteration, and AI-assisted prototyping.

SKILLS

Product & Interaction Design: user flows, information architecture, wireframing, low- to high-fidelity prototyping, mobile-first and responsive design, consumer-facing product experiences.

Research & Iteration: user interviews, usability testing, heuristic evaluation, research synthesis, A/B experimentation, data-informed design decisions.

Visual Design & Design Systems: typography, layout, composition, hierarchy, accessibility, WCAG 2.2, design systems, components, variants, tokens, micro-interactions.

Tools, AI & Prototyping: Figma, FigJam, Figma Slides, Figma Make, Adobe Creative Cloud, GenAI-assisted ideation, AI-assisted prototyping workflows, vibe coding.

PROFESSIONAL EXPERIENCE

Product Design Intern

03/2025 – Present

[Flowers Valley](#) - wedding and corporate floral design company

Concord, USA

- Redesigned the onboarding and subscription experience from user flows and wireframes to high-fidelity prototypes, simplifying a complex sign-up journey for a consumer-facing product.
- Reduced sign-up steps by 38% by cutting the flow from 8 to 5 steps and reducing decision points from 4 to 2, supporting faster user activation.
- Built a lightweight design system with reusable components, variants, and states, enabling visual consistency and faster iteration across product screens.

Growth Design Collaborator

12/2023– 02/2025

[YouTube Channel Alex Demko](#) - developer education channel

Walnut Creek, USA

- Designed and tested thumbnails and content hooks to improve video discovery and engagement.
- Increased CTR from 3.2% to 4.8% and improved average view duration by 26% through A/B experimentation on visual concepts and hook structures.
- Reduced first-30s drop-off by 25% by applying behavioral insights and funnel analysis to align visual design with audience retention goals.

Private Design tutor

01/2022– 11/2023

Independent — 1:1 design education and portfolio mentorship

Remote

- Mentored 18 early-stage designers through structured critiques, strengthening product thinking, UX iteration, and prototype usability from 62 to 78 SUS.

EDUCATION

Essentials of User Experience Design

12/2024 – 02/2025

UC Berkeley Extension

- Designed and iterated on an AI-powered food search experience for people with dietary needs, targeting a reduction in decision time from 3–5 minutes to under 2 minutes.
- Completed a project-based UX/UI program covering user research, wireframing, prototyping, usability testing, and collaborative synthesis.

Bachelor's Degree in Law (Business Emphasis)

2016 – 2022

Donetsk National University named after Vasyl Stus

- Built a foundation in commercial law, contracts, privacy, and compliance that supports risk-aware product thinking.
- Developed analytical reasoning, business judgment, and clear stakeholder communication through structured problem-solving and evidence-based argumentation.

Art Program

2009 – 2017

Vinnytsia Children's Art Department, School No. 2

- Completed an 8-year program in classical and applied arts, building a strong foundation in composition, perspective, color theory, and visual hierarchy.
- Developed visual storytelling, critique, and iteration skills that continue to inform clear, detail-oriented UI design.
